DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Wu.

Wu's Fig. 1 illustrates a filter engine including a SIMD processor, note the abstract, that processes data from a first memory element (e.g. rs21-rs2n) and a second memory element (e.g. rs11-rs1n and rb) to simultaneously perform filtering operations on blocks of data from the first and second memory elements. Note that Fig. 13 illustrates FIR filtering. Relative to the non-split operation mode note that Fig. 20 receives data from only one of the first and second memory elements. Relative to the first and second sets of data path units note the processing elements of Fig. 1.

Specification

3. The status of all referenced applications on pages 1-2 are required to be updated.
